

INTRODUCTION

I would like to introduce PULSE. PULSE is the Prime Users Library Service. It is a free service to the Prime Users Group, which is sponsored and administered by Prime Computer Incorporated.

PULSE is a cooperative software library of programs, techniques and subroutines developed by Prime Computer users. As a Prime Computer user, you can submit your programs to the PULSE library and use other library programs. This is at no charge to the requestor except as noted in the chargeable software section of the catalog.

PULSE provides these services:

- o reviews and processes PULSE software requests
- o conducts searches for software among the user group community
- o updates the PULSE Program Library and catalog
- o ships programs and documentation to those who request them

The programs that you obtain through PULSE may be specialized by the contributor for use on his Prime system, and may require modification for use on your Prime system. In those instances, Prime is solely a intermediary to receive, file, and distribute programs.

If you wish to become affiliated with PULSE, all you have to do is fill out the postage paid User Group Registration Card and drop it in the mail. This card can be found in the Software Documentation Booklet shipped with every Prime system. If you did not receive a registration card and want to register, write your complete mailing address on a card and mail it to:

Prime Computer Inc.
40 Walnut Street
Wellesley, Massachusetts 02181
Attn: User Group Coordinator

Registered PULSE members will receive bi-monthly newsletters that detail recent meeting events, future user group meetings, proceedings, attendees, new library program submittals, training offerings, and new literature offerings. Registered members also receive Software Release Bulletins.

If you have any questions concerning User Groups or PULSE, please direct them to your local Prime sales office or to Roland Kittredge, User Group Coordinator at 617-879-2960, extension 4666.

DISCLAIMER

Prime Computer, Inc. hereby grants to the requesting party, a non-exclusive, worldwide, paid-up license to use, copy, perform, or modify non-chargeable PULSE Library programs. The Submitter and/or Prime make no warranty that such program and any related materials, will not infringe any right of any third party, and no express or implied warranty, including the implied warranties of merchantability and fitness for a particular purpose, is made nor responsibility assumed as to the accuracy, maintenance or functioning of such programs or any related materials. MAXIMUM FILE SIZE IS NOT LIMITED BY THE SORT-MERGE. KEY
TYPES FOR ASCII RECORDS ARE ALPHANUMERIC AND NUMERIC, KEY
TYPES FOR BINARY RECORDS INCLUDE INTEGER, DOUBLE PRECISION
INTEGER, REAL, DOUBLE PRECISION REAL, UNSIGNED INTEGER,
BYTE, AND BIT. COLLATING SEQUENCE IS USER CHANGEABLE.
RECORDS WITH EQUAL KEY VALUES RETAIN THEIR RELATIVE ORDER.
THE SORT-MERGE CAN BE RUN FROM A TERMINAL, A COMMAND FILE,
OR BY THE BATCH PROCESSOR, AND IT CAN INTERACT WITH USER
WRITTEN PROGRAMS. IT OPERATES FROM AN EASILY PREPARED
SPECIFICATION FILE. TYPICAL EXECUTION SPEED FOR SORTING AN
ASCII FILE WITH 80 CHARACTER RECORDS IS OVER 5 TIMES GREATER
THAN THE SPEED OF THE PRIME SUPPLIED SORT AS OF REVISION 14.
THE BASIC FULL RECORD SORT-MERGE PROGRAMS USE LESS THAN 32K
WORDS OF MEMORY. ALSO INCLUDED IN THE SYSTEM ARE A 64K FULL
RECORD SORT-MERGE OPTION, A TAG-SORT OPTION, AND A MERGE

COST: \$250.00
DESCRIPTION: SPL820 IS A SPOOL PROGRAM SIMILAR TO 'SPOOL'
CREATED TO SUPPORT THE TEXAS INSTRUMENTS FAMILY OF TI820
AND TI810 SERIAL PRINTERS. CONVERSION TO ANY SERIAL PRINTER
IS EASILY ACCOMPLISHED. THE PROGRAM EXPECTS THE PRINTER TO
BE CONNECTED VIA AN EXTENSION, OR AUXILIARY PORT, OFF THE
USER TERMINAL. THE PROGRAM TURNS THE PRINTER ON AND OFF TO
EXCLUDE NORMAL INTERACTIVE DIALOG.
SPL820 CONTAINS ENHANCEMENTS BEYOND THE NORMAL '-L' AND '-F'
OPTIONS OF SPOOL. THE PAGE NUMBER, TIME, AND DATE ARE PRINTED
AT THE PHYSICAL TOP OF FORM JUST AFTER THE PERFORATION. TO
SUPPRESS THIS FEATURE, THE '-X' OPTION IS SELECTED.
THE '-C' (COMPRESS) OPTION SELECTS THE COMPRESSED MODE WHICH
PRINTS 16.5 CHARACTERS PER INCH HORIZONTALLY TO ALLOW 132
COLUMNS ON 8.5 INCH PAPER. THE '-I' (INDENT) OPTION INDENTS
THE TEXT TO THE RIGHT TO ALLOW ROOM FOR HOLE PUNCHING. THE
'-P' (PAGE) OPTION BEGINS PRINTING AT A SPECIFIED PAGE,
USEFUL WHEN LINE PROBLEMS OR PAPER PROBLEMS CAUSE PRINTING
ERROR, OR WHEN ONLY A SPECIFIC PAGE IS DESIRED. THE '-D'
OPTION WILL DOUBLE SPACE FOR AN EXPANDED LISTING. THE '-NOH'
OPTION WILL SUPPRESS THE SUB-HEADER.

HARDWARE REQD: PRIME 150 to 750, Prime 400 and 500
LANGUAGE: FORTRAN
PURPOSE: RSA/DBLOG is a complete transaction logging and recovery
system for on-line applications.
RSA/DBLOG provides the facility for recovering from a loss of
data right up to the point where the failure occurred. The
RSA/DBLOG system maintains a log record of all file additions,
changes and deletions on magnetic tape and/or disk. All
logging records are checkpointed to insure only completed
records are reposted during the recovery process. All partial
records are reported on an exception display, and not part-
ially reposted. The RSA/DBLOG system has the ability to selec-
